CAREER OBJECTIVE

Aspiring Software Engineer and B.Tech Information Technology student with a strong interest in software development, problem solving, and emerging technologies. Skilled in Python, Java, C, HTML, and web development, with hands-on exposure to AI, cybersecurity, and cloud concepts. Eager to build practical solutions, strengthen engineering skills, and contribute to innovative software projects.

EDUCATION

B.Tech — Information Technology | Mount Zion College of Engineering and Technology | 3rd Year

TECHNICAL SKILLS

Programming: Python, Java, C

Web Development: HTML, CSS, JavaScript

Databases: MongoDB

AI & Cybersecurity: AI-powered application concepts, cybersecurity fundamentals

Cloud & Tools: Cloud computing fundamentals, Git, GitHub, VS Code

PROJECTS

Sentinel AI — AI-Powered MSME Cybersecurity Platform

Designed a concept for an AI-powered platform focused on helping MSMEs identify cybersecurity risks and improve business protection. Worked on the problem definition, solution flow, presentation, and product-oriented design.

Personal Portfolio Website

Built and deployed a modern personal portfolio to showcase education, skills, projects, achievements, and contact information.

Technologies: HTML, CSS, JavaScript, GitHub, Vercel

CERTIFICATIONS & WORKSHOPS

- MongoDB — Completed MongoDB courses
- Cloud Computing — Completed 3-day workshop

EXPERIENCE

- **Fresher** — currently seeking opportunities to gain practical software engineering experience.

LANGUAGES

English, Tamil, French

ADDITIONAL STRENGTHS

- Problem solving and continuous learning
- Interest in AI, cybersecurity, cloud computing, and software development
- Strong willingness to work on real-world projects and collaborative technical teams
